Model:MMM

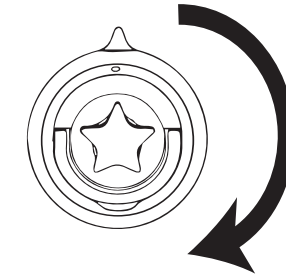

Component 部件說明

Dimension : 50*53*28 mm

Weight : 75 g

Magnetic Adjustment 磁力調節

Turn the dial clockwise up to 2 full turns to reach minimum magnetic force for safe removal and storage. Over-rotation may cause the magnet to detach.

順時針旋轉轉軸至定位，最多 2 圈，即可釋放最小磁力，方便拆卸與收納。過度旋轉可能導致磁鐵脫落。

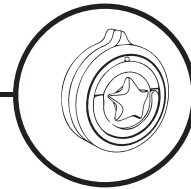

Notice 注意事項

- 1 The handle is for tying purposes only. Do not use it to pull the magnet. Pulling may cause structural damage or injury.
隱形提把僅供綁繩使用，請勿拉扯以拔除磁鐵，避免損壞或造成傷害。
- 2 Turn the dial clockwise to reduce magnetic force, then lift vertically to avoid surface scratches.
取下磁鐵前，請先順時針轉動轉軸減弱磁力，再垂直提起，以避免刮傷表面。
- 3 Avoid temperatures above 80°C to prevent magnetic failure.
請勿接觸高於 80°C 的高溫，以免磁力失效。
- 4 Keep away from these items:
Mobile devices / laptops
Pacemakers or medical equipment
Magnetic cards
data storage media
請遠離以下設備，以免磁場干擾：
行動裝置 / 筆記型電腦
心律調節器或醫療器材
磁條卡 / 磁性資料媒體
- 5 Rubber Ring Notes:
If it comes off, reattach with glue.
If it loses elasticity, soak it in hot water separately (do not place the magnet in hot water).
膠圈注意事項：
若意外脫落，請點膠黏回。
失去彈性時可單獨泡熱水（請勿將磁鐵放入熱水）。

Multify Function 多功能結構

- **Base Magnet 強力磁吸**
Supports up to 7 kg with full magnetic strength.
吸附時最大承重為 7 公斤。

- **Top Magnet 表面吸附**

Front side is magnetic for small item attachment.
正面具磁性，可吸附小物。

- **Hang 掛**

Loosen the top star Nut to use the center gap as a temporary hanging point.
旋鬆星形螺母，中間空隙可作為臨時吊掛點。

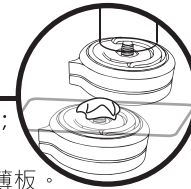

- **Hook 勾**

Lift for hanging items.
掀起鉤環可用於掛物。

- **Lock 鎖**

M6 thread connects with compatible devices;
use with star knob to secure thin panels.
M6 螺牙可連接同規格裝置，搭配星形螺母可固定薄板。

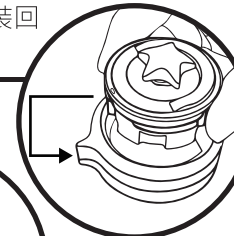

Magnet Reinstallation 安裝脫落磁鐵

If the magnet detaches after over-rotating, follow the steps below to reattach it.
若磁芯因旋轉多圈脫落，可照以下步驟將磁鐵裝回

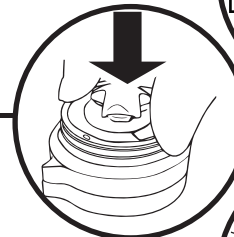

1

Align the base and dial handles with the positioning mark.
對齊基座與旋轉盤的把手至對位點。

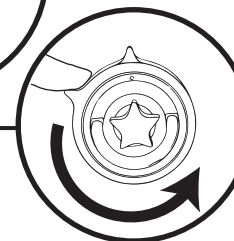

2

Press the magnet core back into place with gentle force.
稍加施力，將磁芯壓回原位。

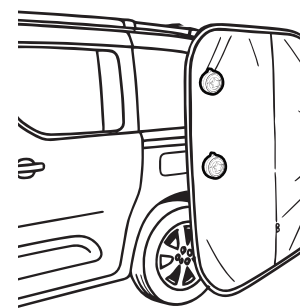

3

Turn the dial counterclockwise to return it to position.
逆時針旋轉轉盤轉回原位。

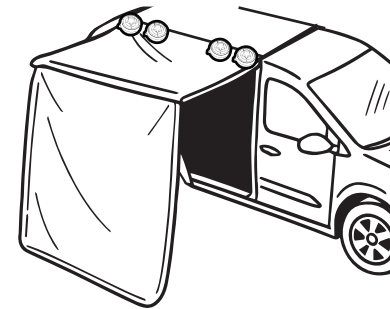

For Tents 帳篷固定

- 1 The strong magnetic base attaches securely to metal or magnetic surfaces such as car sides, tool racks, and cabinets for quick and stable installation.

魔磁內的強力磁鐵可吸附於車體側邊、工具架等金屬或磁性表面，安裝簡便、穩固可靠。

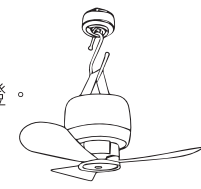

Application 應用

- 2 The front side of the magnet holds metal items like screws for easy storage and access.

磁鐵正面可吸附螺絲等鐵質小物，便於收納與取用。

- 4 The lift can be used with rope or hook systems (e.g., fans, lights).
勾環可搭配繩索或掛勾系統使用，例如風扇、照明燈。

- 5 Thin panels (e.g., solar panels) can be drilled and mounted onto the Magdisk.

可於薄板鑽孔後鎖附於摩磁。
(例如:太陽能板)
