

Specifications

Weight	規格	1.8 kg
Storage Diameter	重量	76 cm (30")
Unfolded Dimensions	收納直徑	200 × 200 cm (78" × 78")
	展開尺寸	

1-Piece Set	1片裝
Carsule Lite	主體
User Manual	說明書
Storage bag	收納袋
Accessory bag	配件包

2-Piece Set	2片裝
Carsule Lite	主體
User Manual	說明書
Storage bag	收納袋
Accessory bag	配件包

Accessory bag 配件包

Anchor lock strap	錨繩	x 1Pair	Wheel lock rope	張力平衡繩	x 2 PCS
Adjustable fix strap	可調節固定繩	x 2 PCS	Screw-in peg	旋轉營釘	x 2 PCS

First-Time Use Reminders

首次使用提醒

To Unfold:
Hold the frame with both hands and gently release the strap to prevent sudden opening.

展開方式:
請用雙手壓住彈簧鋼(避免突然彈開), 再輕輕解開扣繩。

Upon delivery, your Carsule Lite is secured in an oval shape with a strap to save space during shipping. 當你第一次收到 Carsule Lite 時, 為了減少運輸體積, 我們使用一條扣繩將它壓縮成橢圓形。

How to Unfold

展開方式

Gently flip the folded sections outward — it will instantly pop open into shape. 輕輕將折疊的部分向外翻轉, 瞬間展開成形。

Twist & Fold

旋轉摺疊

1 Fold the Carsule lite in half. 將Carsule lite 對折

2 Grip the frame with both hands at about one-third of its length. 雙手握住框架約三分之一處

3 Remaining in contact, move your hands back along the frames. 雙手順著黃框向後滑並聚攏

4 With one hand holding each yellow frame on both sides, fold the inner ring inward. 單手握住兩邊的黃框, 並將內圈往內折。

5 Overlap the ring by folding it left and right. 向左、向右覆蓋

6 Flatten it and place it into the storage bag. 壓平後放入收納袋

Connecting and Securing Two or More Panels

雙片多片使用與連接固定

1. Two-Panel Connection

兩片拼接

1 Stack and align the two panels precisely. 將兩片對齊疊合

2 Lift the Carsule Lite slightly and tilt it for easier handling. 將carsule lite 抬起, 傾斜一點。

Zipper Handling Tips

- When assembling, pull the zipper head fully to the bottom before inserting the pin into the guide. Make sure the zipper teeth are aligned—do not force it.
- If the plastic zipper gets stuck, do not force it. Slide it back slightly, smooth out the fabric, then push forward again. Excessive force may cause damage.
- When pulling up the first zipper, leave a slight opening to give the second zipper head enough room to stretch and lock into place.

△ 拉鍊操作技巧

- 組裝時拉鍊頭要完全到底再將插銷扣入導槽, 確保拉鍊牙對接上, 不要硬拉拉鍊。
- 塑膠拉鍊卡住, 不要硬拉, 請退回將布整理平整後再往前推, 用力過猛容易損壞。
- 第一條拉鍊拉上時要先拉開退讓, 讓第二條拉鍊頭有拉伸空間可以卡上。

Final View
完成圖

3 Make sure the zipper head is pulled all the way down. Align the slider guide evenly, then insert the insertion pin into the slider guide to lock it in place. 拉鍊頭確保拉到最底, 並且拉鍊導槽調整齊平, 再將插銷扣入拉鍊導槽。

4 Pull zipper heads ① and ② to the corner to fully unzip the section. Make sure the second zipper is flexible. 先將 ① ② 拉鍊頭都拉到轉角處, 讓拉鍊打開, 確保第二條拉鍊有彈性

5 Insert the second zipper into the guide in the same way as the first one, then pull up ③ to complete the closure. 將第二條拉鍊按照第一條拉鍊的方式扣上拉鍊, 並將 ③ 拉上。

6 Finally, zip back ② to complete the connection of the two panels. 最後將 ② 拉回, 兩片拼接就完成了。

2. Infinite Extension

無限延伸

1 Zip up one side using zippers ③ and ④ — first, pull ③ to the end of the L-shaped corner, then unzip ④ up to the corner point. 拉上其中一側的拉鍊(此處使用 ③ 與 ④ 拉鍊), 先將 ③ 拉鍊拉至 L 型轉角尾端, 再拉開 ④ 拉鍊至轉角處。

2 Repeat the same steps to extend and connect as many units as needed. 按照這樣的方式就可以無限拼接延伸。

Accessory Usage Instructions

配件使用說明

1

How to Use the Screw-in Peg: Insert the peg into the ground at a 45° angle and twist it in to secure.

旋轉營釘使用方式
將營釘與地面呈45°角, 並旋轉營釘。

2

Anchor lock strap and adjustable fix strap adjustment 錨繩及固定繩長度調節

3

Wheel lock rope adjustment 張力平衡繩調節

How to use the All Guy Lines
配件繩的基礎用法

1. Anchor Lock Strap
錨繩的用法

Anchor ropes help quickly secure the setup to the vehicle, preventing it from being blown away by wind.
錨繩的作用在於可以快速的跟汽車做固定，避免被風吹走。

- 1 Separate the pair of anchor straps and hook them onto 7 and 12 respectively.
將一對錨繩拆開，分別勾住 7 跟 12

- 2 Hang it onto the roof and tie it to the tailgate to initially secure its position.
掛上車頂，綁在車尾門上，初步固定位置。

2. Adjustable fix strap
可調節固定繩的用法

The purpose of the adjustable fix strap is to provide stable anchoring and prevent the Carsule Lite from shifting side to side.
可調節固定繩的作用是形成穩固的固定，避免 Carsule lite 再左右滑動。

- 1 Hook the adjustable fix strap onto 8 and 11
將可調節固定繩勾住 8 跟 11

* First, insert the hook through the loop, then press it downward—the loop will slide into place and lock onto the hook.
* 先將鉤子的頭穿過掛圈，然後向下拉，掛圈會滑入到位並鎖定在鉤子上。

- 2 Loop the other end of the hook around the car's hydraulic strut or another suitable point, then hook it onto the strap and pull tight to secure.
另一端的鉤子繞過車門液壓桿或其他合適位置，並勾住繩子拉緊固定。

Carsule Lite is designed with 12 attachment loops, compatible with all accessory straps.
Carsule lite 設計12個掛環，可以搭配所有配件繩使用。

3. Wheel lock rope
張力平衡定繩的用法

The purpose of the wheel lock rope is to maintain balance in windy conditions and prevent the setup from being blown over.
張力平衡繩的作用是在有風的時候，利用它保持平衡，避免被吹翻。

- 1 Hook the wheel lock rope onto 1 and 6
將張力平衡繩勾住 1 跟 6

- 2 Loop it around the tire or door handle, hook it back onto itself, then adjust the length to secure it in place.
繞在輪胎或門把手上，再將鉤子勾到繩子上，然後拉緊固定。

Example
範例

- 1 Hold the end of the Carsule Lite and lift it up above the rear hatch.
將 Carsule Lite 握住尾端，向上推到車尾門上方

- 2 By securing the accessory straps as described above, basic sunshade setup is complete.
按照上面的配件繩固定，就可以完成基本的遮陽。

The accessory straps can be freely attached to different loop positions for various uses. In addition to the basic rear sunshade setup, they can also be used to create side shading.
配件繩可以任意搭配不同的掛圈位置，做不同的運用方式，除了基本的車尾遮陽，也可以做為側面遮陽使用。

Dual-Panel Mount

雙片連接車體方式

Application
應用

Compatible with all vehicle types.
適配所有車型

Side Sunshade
側遮陽板

3PCS-A

3PCS-B

3-panel connection

三片連結的方式

*For quicker setup and more versatile use, magnetic attachments can be used. These magnets are available for purchase on our official website.
*想要快速組裝及更多運用，可以搭配磁鐵固定做使用，磁鐵可透過官網訂購 <https://www.elvesfactory.com/worldshop/EN/MOGICS/Camping/MMM>

Usage and Maintenance Guidelines

使用與保養注意事項

Keep Away from Open Flames

Carsule Lite is made with flame-retardant materials. However, please note:
Fireproof ≠ Flame-Retardant
Fireproof materials do not burn at all; flame-retardant materials slow down burning and reduce flame spread but can still catch fire. Always keep away from open flames.

遠離火源

Carsule Lite 採用阻燃材料，但請注意：
防火 ≠ 阻燃
防火材料完全不燃燒；阻燃材料則能延緩燃燒、減少火焰擴散，但仍可能起火。請務必遠離火源。

Avoid Dragging on Hard Surfaces

Do not drag the Carsule Lite on gravel, concrete, asphalt, or other hard surfaces. This can scratch the edges or fabric and shorten the product's lifespan. Always lift and carry it carefully.

避免在硬地拖拉

請勿在石子路、水泥地、柏油路等硬地拖拉Carsule Lite，這會刮傷邊緣或布料，縮短產品壽命。請小心提拿搬動。

Not Recommended in Strong Winds

If wind force reaches level 5 (you can refer to a carp streamer standing straight as an indicator), we recommend stopping use or taking down the tent. Strong winds make setup difficult and pose a risk of the tent being blown over.

風力過大不建議使用

當風力達到 5 級（可參考鯉魚旗直挺的示意圖）時，建議停止使用或架設，因為強風會讓帳篷架設困難，甚至有吹翻危險。

Reinforce Fixing to Prevent Sudden Strong Winds (Magnetic Fixing)

If the wind suddenly strengthens or there is a risk of gusts, be sure to secure the tent with anchor ropes or safety lines in addition to magnetic fixings, to prevent it from being blown away.

加強固定以防突發強風（使用磁鐵固定）

當風力突然增強或有突發強風疑慮時，請務必使用錨繩或安全繩將帳篷多重固定，避免單靠磁鐵固定而被吹走。

Use Rain Lines or Rain Covers in Wet Weather

The top of the Carsule Lite is flat; it must be sealed to allow rainwater to run off and prevent pooling. When using multiple Carsule Lite units together as a roof, cover with a rain tarp to avoid water seepage through zipper seams.

雨天使用需拉雨線或搭雨布

Carsule Lite 頂面為平面，需拉斜讓雨水順勢滑落，避免積水。若使用多片 Carsule Lite 作為屋頂，需鋪上雨布，避免拉鍊縫滲水。

Do Not Store Wet

If it rains or the tent becomes damp during use, wipe it dry before storing to prevent mold and odors.

避免收濕帳

使用過後如遇下雨或潮濕，請擦乾後再收納，避免發霉產生霉味。
