More Detail

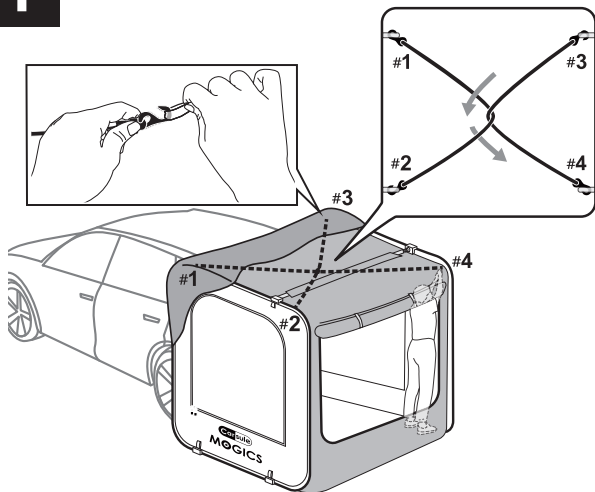

Stand Alone Usage (Tension Rope Guy-Rope)

Please set up the guy-ropes when Carsule is set standing alone. It is not advised to use Carsule independently in strong wind.

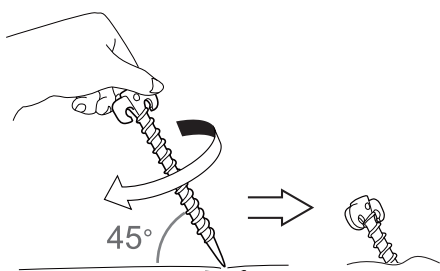

Instruction Video

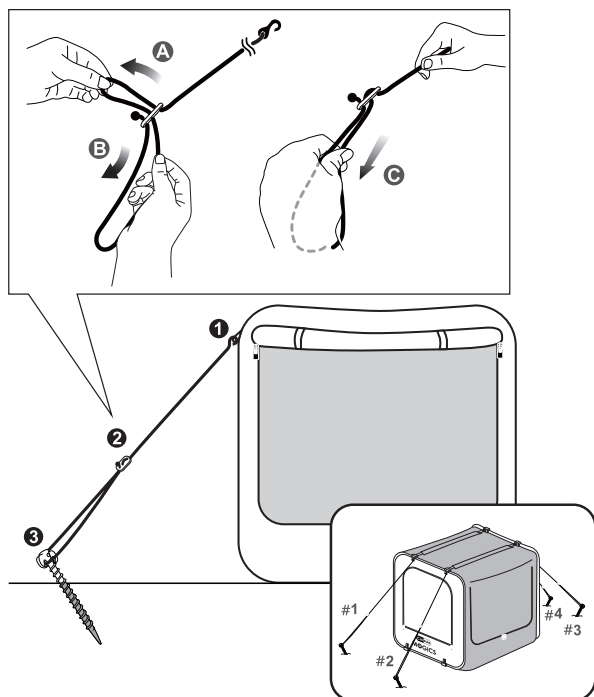

1 Hang the tension ropes.

2 Place the peg at 45 degrees to the ground, and swirl it downward into the ground.

3 Fix the guy-ropes on the fixing ring, and adjust the ropes to tie the pegs.

Roof Supporter & Rain-Fly

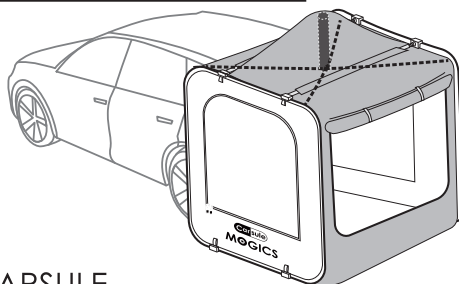

Be sure to set up the roof supporter and rain-fly when raining.

Instruction Video

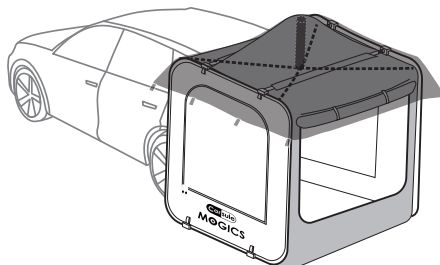

1

Insert the roof support.

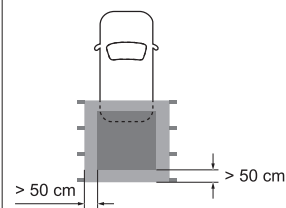

2

Cover CARSULE with the rain-fly.

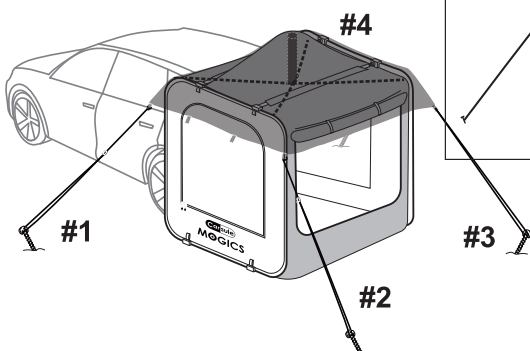

Advised Position

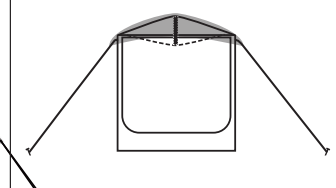

3

Fasten the corner guy-ropes.

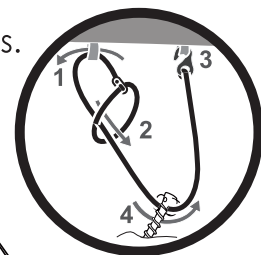

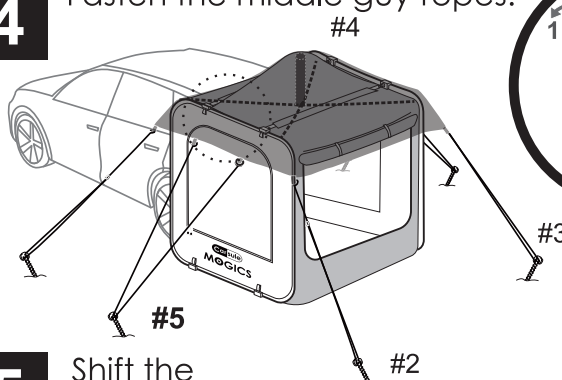

Side View

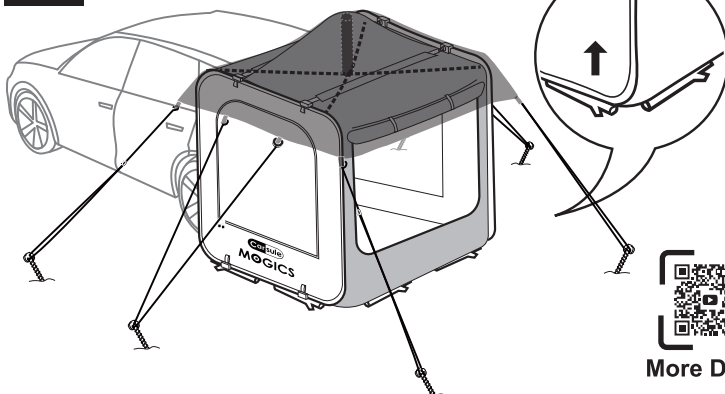

4

5

Shift the four corner

More Detail

Disassembly Preparation

Unlock the anchor strap

Close the trunk

Untie the tension ropes

Fold the felt rug

Unfasten the guy-ropes

Collect the magnet cord

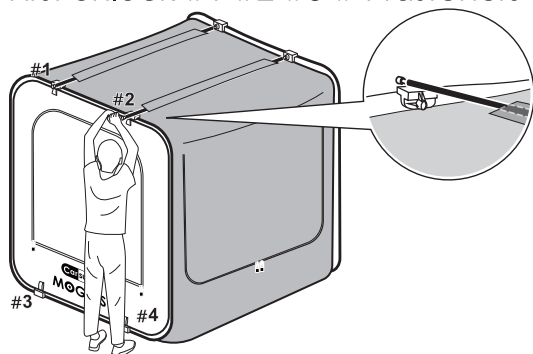

Remove the pegs

Fold the Carsule

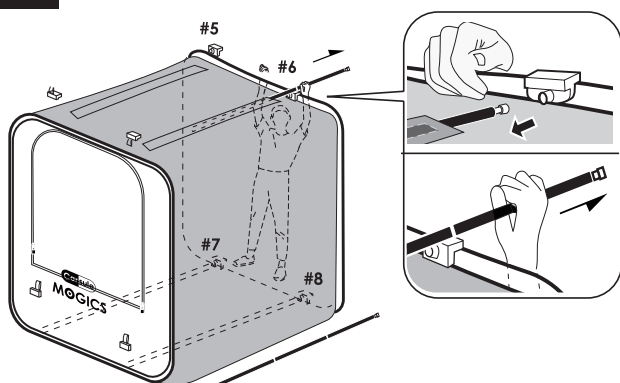

Instruction Video ▶

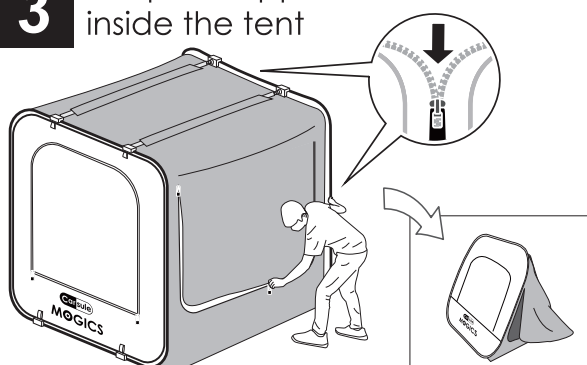

1 First unlock #1 #2 #3 #4 fasteners

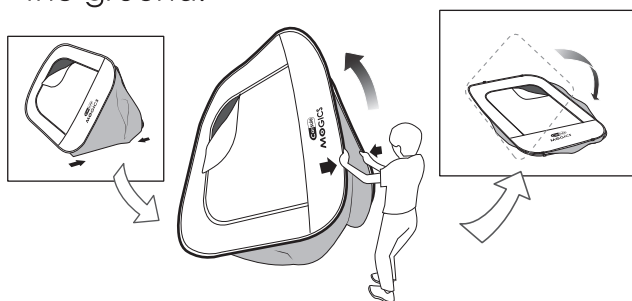

2 Unfasten the #5 #6 #7 #8 fasteners and take out 4 aluminum rods

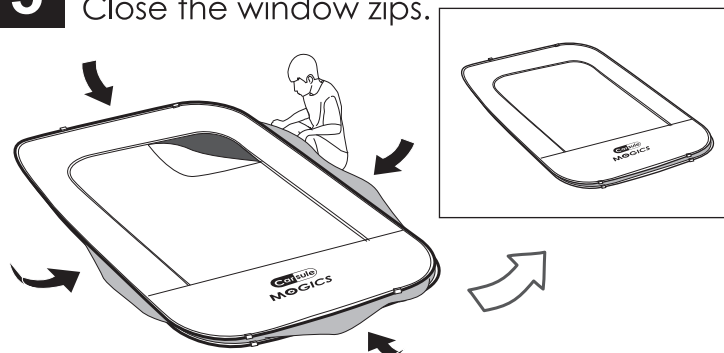

3 Unzip the zipper to release the air inside the tent

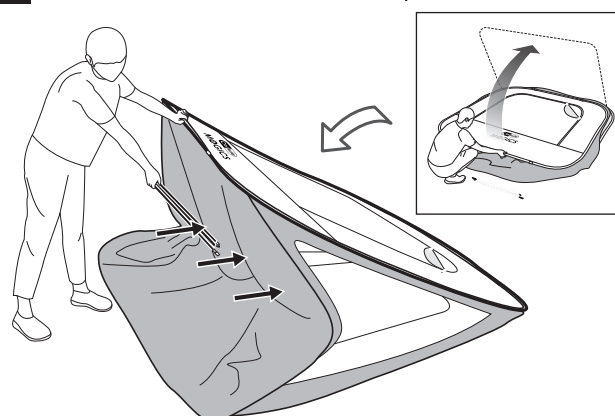

4 Hold the lower edge of both ends of the frame and lift them up slightly, And fold them inwards and place it flat on the ground.

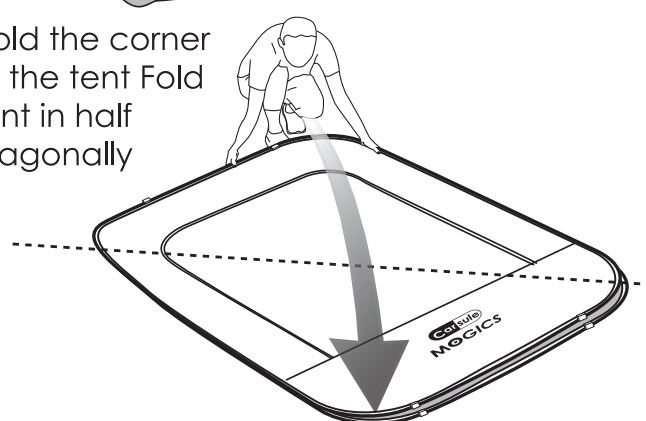

5 Tuck the protruding cloth inwards neatly, Close the window zips.

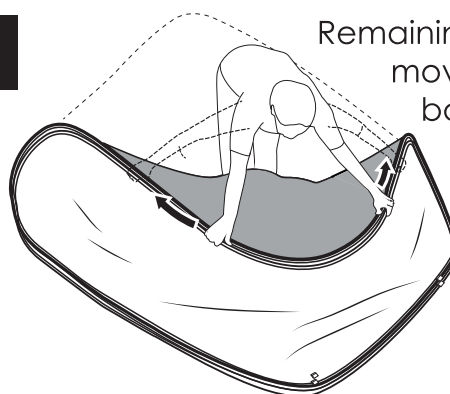

6 Lift up the bottom, and use the folded rod to thrust the bottom flap inward.

7 Hold the corner of the tent Fold tent in half diagonally

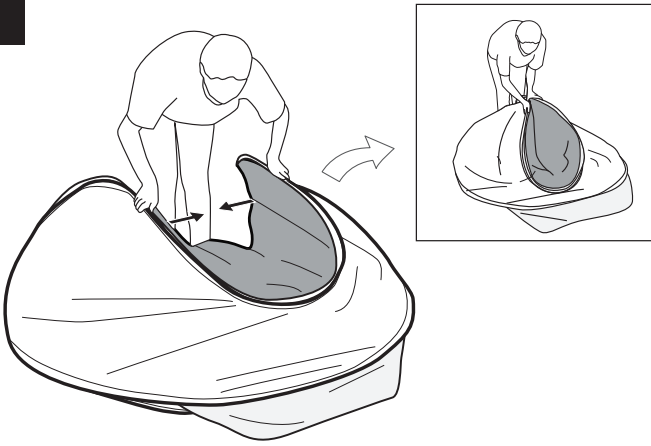

8 Remaining in contact, move your hands back along the frames

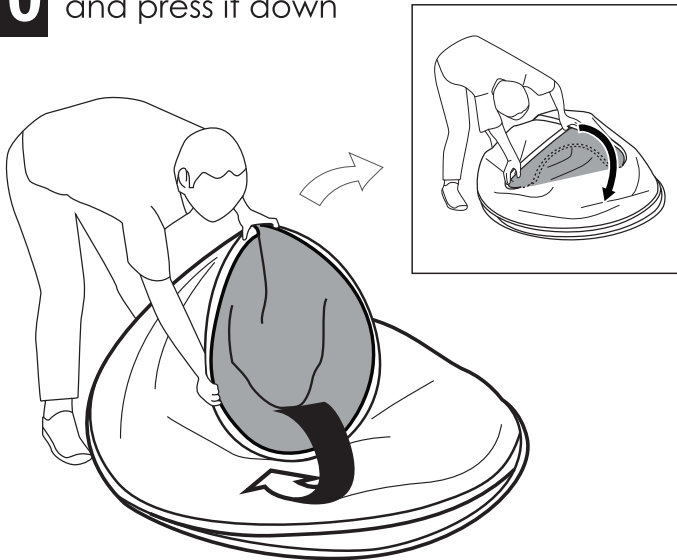

9

Bring your hands together to fold the sides

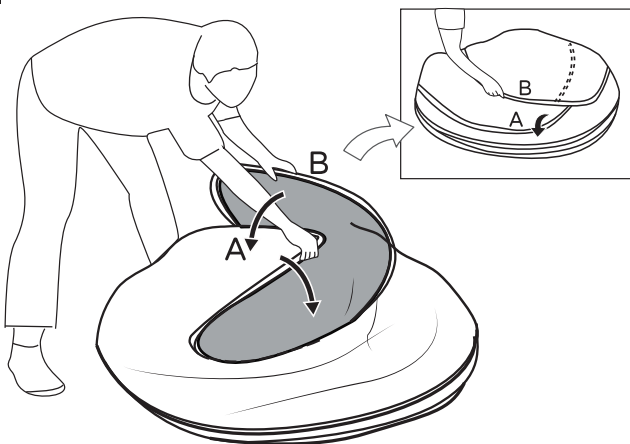

10

Tuck the middle circle inward and press it down

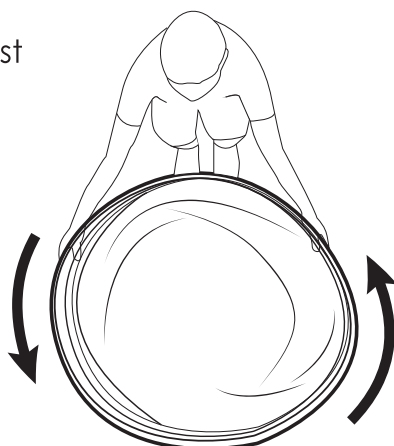

11

First press frame A to the middle, Then press frame B to the middle

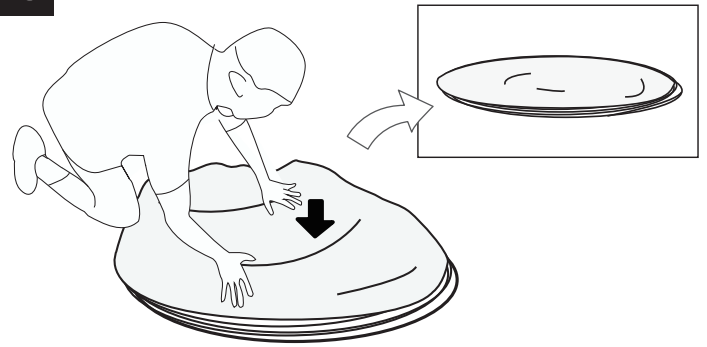

12

Twist and adjust the frame to get circles of the same size

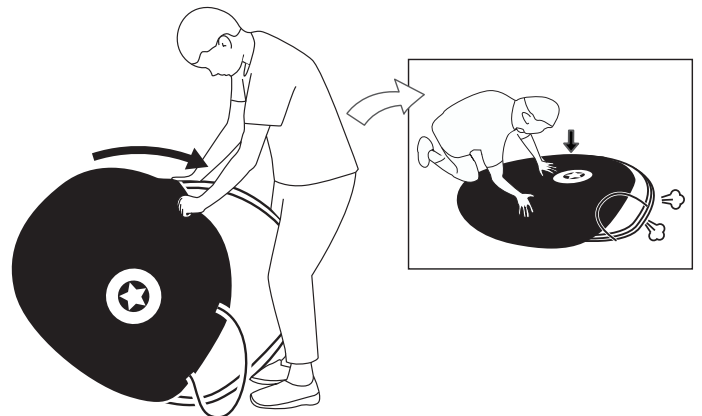

13

Squeeze out the air from the tent

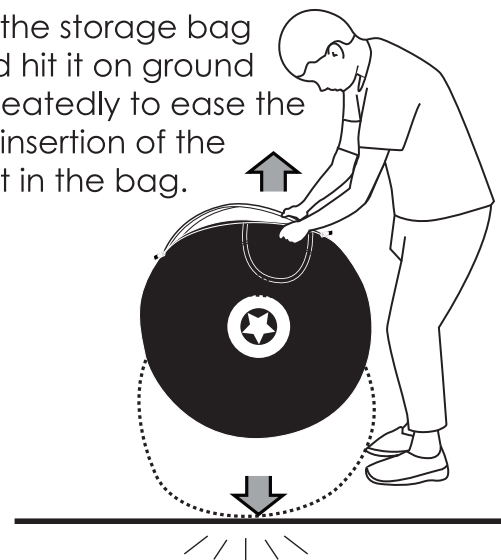

14

Put the tent in the bag and further squeeze out the air in the storage bag

15

Lift the storage bag and hit it on ground repeatedly to ease the full insertion of the tent in the bag.

16

With one hand, press the tent into the storage bag, and with another, zip up to complete the tent storage.
